

Nitin Chatlani

Intern @ Arm | Building agentic tools for chip design | M.S. AI @ SDSU (Fall 2026)

WORK EXPERIENCE

Power + Performance Engineer Intern, Arm

San Diego, CA Summer 2026

- Architected a custom agentic harness (Codex-5.6 Luna) with MSAL-integrated tools for secure access to internal engineering resources
- Enhanced an internal RAG knowledge platform by implementing agent capabilities that improved retrieval quality and reduced stale SoC engineering data
- Evolved a conversational chatbot into an agentic engineering assistant that automated design-critical SoC calculations (power, latency, thermal, routing) and technical knowledge retrieval for AGI CPU team
- Designed and implemented SQL-backed telemetry infrastructure and a custom usage dashboard to track agent workflows, page navigation, and interaction metrics, enabling data-driven improvements

Software Engineering + AI Intern, Airbuild Inc.

Remote Summer 2025

- Developed and deployed a full-stack SCADA system, combining live sensor data from on-site, AWS(S3, Lambda, EC2, IAM), and a JS frontend to enable real-time AI-powered algae monitoring
- Automated the creation of custom co-worker Slack agents; used Canva MCP, Google Suite, Sensors, Wix, and custom agent tools, skills, and cron jobs - allowing employees to “hand off” assignments

Data Integration + Platform Insights Intern, pladis Global

Remote Spring, Summer 2024

- Developed and deployed a dynamic dashboard; integrated numerous internal and market data sources for the entire North American Insights and Marketing groups to keep track of industry shifts
- Application provided key insights that impacted releases, website changes, social media activations, and other product-related initiatives

ACADEMIC ROLES

Lab Coordinator, SDSU AI4Business Research Lab

San Diego, CA Spring 2024 - Present

- Worked under Professor Vivian Huangfu managing 10+ Python-based research projects
- Interviewed diverse research assistant candidates to evaluate their technical experience and assess their suitability for R-1 caliber research
- Contributed to CodeGPT Project - enhanced deep learning-based Code Search model by leveraging LLM pre-training techniques along with data labeling and refactoring

Graduate Teaching Assistant, Business Systems Analysis and Design (MIS695+MIS515)

San Diego, CA 2024-25 School Year

- Sole undergraduate Teaching Assistant, responsible for grading 20+ assignments, holding weekly office hours, and providing in-class assistance to 30+ graduate students

Student Research Assistant, San Diego State University

San Diego, CA Spring 2023

- Worked on Computer Science Education research with CS professor Miranda Parker
- Investigated how spatial skills training affects success in CS courses and identifying and reducing biases in CS assessments by developing human-subject research studies

EXTRACURRICULAR ROLES

eLeetCode Club @ SDSU

Vice President

San Diego, CA June 2024 - May 2026

- Organized club meetings for 450+ members; students worked on improving LeetCode problem-solving skills in a collaborative environment in which guest lecturers shared their expertise

Association for Computer Machinery (ACM) @ SDSU

Vice President of Operations

San Diego, CA May 2024 - August 2025

- Co-founder and leader of the ACM chapter at San Diego State University with 200+ members
- Aspired to fill in learning gaps for CS Students by providing supplementary learning material

COURSEWORK

- CS150 - Introduction to Java
- CS160 - Advanced Java
- CS210 - Data Structures + Algorithms (C++)
- CS240 - Computer Organization (Assembly)
- CS250 - Software Systems
- CS370 - Computer Architecture (LogicWorks)
- CS514 - Database Theory + Implementation
- CS420 - Advanced Programming Languages (C, JS)
- CS450 - Introduction to AI (Python)
- CS480 - Operating Systems (C++)
- CS549 - Machine Learning (Python)
- CS576 - Networks + Dist. Systems
- CS574 - Computer Security
- CISC240 - Discrete Structures
- MATH254 - Linear Algebra
- MATH336 - Mathematical Modeling
- PHYS195 - Calculus Based Physics
- PHYS196 - Electricity + Magnetism

San Diego, CA

760.402.6231

TECHNICAL SKILLS

Java

Python

C++

SQL

AI

Assembly (MIPS)

GIT

C

AWS

HTML

CSS

Bootstrap

Azure

JS

Google Cloud

ML

EDUCATION

San Diego State University

San Diego, CA

Starting Fall 2026

M.S. Artificial Intelligence + Technology

San Diego State University

San Diego, CA

2022 - 2026

B.S. Computer Science | Mathematics Minor

PROJECTS

SpinArchitect - Playlist+Plan Builder

Developer/User | DOSE Fitness

Half move library (RPM- and resistance-tagged drills), half drag-and-drop track builder — exports as one unified playlist for instructor ease.

FallSense Automated Fall Detector

Embedded Engineer

Combined Arduino Nano ESP32 + Edge AI and built a cost effective wireless PNP fall-detection device, making it easily available to fall-prone individuals

Personal Website Portfolio

Developer

Used Bootstrap, HTML, CSS, JS to develop custom online resume. Published using Github; view portfolio using link ([🔗](#))

CERTIFICATIONS

Armis Cyber Defense Core Badge

Offered by Armis University, 2022

Information Privacy and Security (IPS) | Student Certification

Offered by CITI Program, 2023
